

Company

Associate Décor Limited (ADL) is one of the leading players in the Indian wood panel products market. The Company is a joint venture between the Associate Group and Kings Wood, Bengaluru. The company currently manufactures premium decorative laminates as well as the most advanced and intelligent plain and pre-laminated particleboards & MDF boards in India. Future plans involve expanding the product offering to include veneers and flooring. ADL mainly operates in the panel products space catering to both Indian and international markets.

Products Par Excellence

Associate Pre-Laminated Particleboards (Melamine Faced Chipboards or MFCs) are the best engineered ones in the country, available in several functional variants and made using state-of-the-art international production technology. Our MFCs are available in the unique **E0 and E1 Grades (products with the lowest formaldehyde emissions in India, an indication of our true commitment to the environment.)**, Fire-retardant Grade, Marine Grade and Exterior Grade, in a wide range of thickness and sizes. Associate Laminates are made using advanced European technology and are available in 1.0mm, 0.8mm, 0.6mm thickness and in the Flexible Post-Forming series.

The E1 Pre-laminated Particleboards from Associate pass the requirements of the IS 12823 Grade II Type II (1990) having formaldehyde content of less than 8 mg per 100 gm of oven dry boards tested as per IS 13745. These boards fulfill stringent norms of bending strength, screw-withdrawal strength and modulus of elasticity. Created using authentic and handpicked European décors and textures, these boards are not only advanced but also beautifully designed.

India's Largest Particleboard & MFC Manufacturing Plant

ADL's wood panel production plant in Karnataka houses the best machinery for production of high-pressure laminates, plain particleboards and pre-laminated particleboards (Melamine Faced Chipboards, MFC) in South Asia. The plant is geared to produce an output of 1100 CBM / Day, which is many times more than any other producer's in the country. Besides this, it's equipped with the largest testing & quality control lab in India.

Eco-friendly efforts

ADL is a member of the Indian Green Building Council (IGBC). By producing real E0 and E1 grade boards, the Company is the most eco-friendly particleboard plant in India today. Its facility incorporates a number of emission reducing, water saving and energy conserving elements in its daily functioning to help reduce the carbon footprint. The Company's other activities through the year include plantation drives, seedling distribution drives and land maintenance programs.
