

Associate Décor Limited

Laminates that are crafted with unbridled passion. And the perfect technology to complement it.

Associate Décor Limited has one of the most advanced set-ups in India for the manufacturing of High Pressure Laminates. A set-up that perfectly complements its expertise in bringing the finest designs and textures to India.

The laminate press line at ADL produces perfectly cured laminates with the highest standards of internal and surface properties. The set-up comprises of state-of-the-art components that add value at every stage of the manufacturing process. The press line has a custom-designed 16 Daylight Press and a world-class VITS Impregnator machines for “double dip” impregnation with a high-sensitivity temperature control system that facilitates uniform quality of paper. This is complemented by sanding machines from one of the world’s leading manufacturers - Steinemann - that accurately maintain laminate thickness, thus making the application of laminates by the end customer an easy task.

Every aspect of technology being set-up at the plant also has behind it expertise and experience that is unmatched in this industry. The resin and process control systems have been set up by the finest exponents of this technology from Europe, with over 3 decades of experience in the area. The high-pressure, hot water system press line has been set up by India’s best manufacturer, with specialized know-how that increases the life of the press-plates and ensures that there is no machine down-time and uniform & consistent temperatures in the press to ensure defect-free laminates.

All in all, a set-up of tomorrow that gives you some of India’s finest laminates, today. Associate Laminates from Associate Décor Limited.
